## Explore the Final Frontier at Toledo's Science Center

*Space Week visitors will uncover the mysteries of Earth's solar system*

TOLEDO, Ohio – Space...the final frontier...for exciting science exploration! Imagination Station will help unravel the mysteries of the Milky Way during Space Week, February 25 – March 1.

The sun, moon and planets each have unique and complex motions that cause them to interact in interesting ways. Imagination Station visitors will examine the motions of the celestial bodies in our solar system.

Take a giant leap into space exploration by:

- viewing the night sky in the science center's StarLab® planetarium
- examining star maps
- discovering the effects of gravity on the planets
- seeing a real tile from a space shuttle
- participating in an asteroid mining design contest

Little Scientists Week activities are included in science center admission.

Imagination Station provides a critical layer of science enrichment by serving as an educational partner for teachers, schools and parents. It's with a thoughtful blend of exhibits, experiences, education and excitement that Imagination Station inspires visitors to pursue STEM careers in Northwest Ohio.

For more information, please call 419.244.2674 or visit [www.imaginationstationtoledo.org](http://www.imaginationstationtoledo.org).
