Summer of Speed continues at Imagination Station with UT Rocket Motorsports

TOLEDO, Ohio – Zip into the Imagination Station to test your engineering design skills, explore physics concepts and discover how vehicles move so fast.

Summer of Speed continues all summer long and visitors can design and race a wind-powered sail car, send LEGO® blocks cars speeding down the test track, build a chassis using PVC pipe and pose for a photo in the winner's circle with a real stock car.

Race fans can also learn how The University of Toledo's Rocket Motorsports team takes their competition car from blueprint to the racetrack. Discover how the engineering design process helps the team design, build, test and tweak their car for competition season, then join in the fun and give tire bowling a spin!

On Saturdays, Lucas County residents receive a \$2 admission discount and free admission for Lucas County kids, ages 12 and under with a paid adult admission.

Imagination Station is hosting *Summer of Speed* activities now through September 2. Visit imaginationstationtoledo.org for a full events listing. Don't wait –the summer's gonna go fast!

WHAT: Summer of Speed with UT Rocket Motorsports

**WHEN: Saturday, June 8
10am – 5pm**

All *Summer of Speed* activities are included with science center admission.

Imagination Station provides a critical layer of science enrichment by serving as an educational partner for teachers, schools and parents. It's with a thoughtful blend of exhibits, experiences, education and excitement that Imagination Station inspires visitors to pursue STEM careers in Northwest Ohio.
